Girl, Released After Suffering His Arrogant Confidence Gone, Thaw Is More Easily Managed by His Lawyers Than at Former Trial.

By Nixola Greeley-Jmith.

Harry Thaw's defense has begun. Delay in the arrival of witnesses caused an early adjournment yesterday, but his jury has already heard the physician who attended him in infancy, his teacher when he was sixteen years old, and the trained nurse who cared for him at Monte Carlo during a fever ten years ago, unite in declaring him, in their opinion, irrational at

Certainly the whole truth about Harry Thaw has yet to be told.

I do not believe it is to be found in Mr. Jerome's cinemetograph pictures of the defendant, whom he has represented in one moment as a cold-blooded murderer whose death he demanded, and for whom, in the next, he asked and obtained a commission in lunacy, on his belief that he was unable to advise with his counsel.

I do not think it lies, in its entirety, in Martin Littleton's portrait of tless the defendant as a child born on the border line between insanity and

I believe in mine, and, similarly, every person present in the court-room has in his mind a picture of insanity, or degeneracy, or duped stupidity, that he has constructed and labeled Harry Thaw.

Each jury in the box, doubtless, Las a different picture. Will the composite formed from these in the final deliberations of the jury room be the w ole truth? I doubt it very much.

Persons have come into court, looked at Thaw a few moments and great Persons have come into court, looked at Thaw a few moments, and gone away to write that he looked like a degenerate. Others have described him as a "lovable youth."

He doesn't seem like either of these things to me. I don't pretend to say at all what he is, but merely what in my eyes he looks like, and that is a tall young man with a rather homely face, and a good figure that has grown much thinner in the year which has elapsed since his first trial. Whether he was sane or insane on June 25, 1906, his jury will decide. To Young Woman Drowns Her- Quinn Tried to Lower Himme he does not look crazy. One sees more abnormal looking persons in the Mrs. Harry Shapiro, of No. 245 East streets and in the cars every day,

He does not look like Mr. Jerome's picture of him as a deliberate murderer, nor yet like Mr. Littleton's sketch of a genius whose mind, lacking centripetal force, made him a madman. He does not seem like the gilded before she was the wife of her present debauchee many persons believe him to have been,

Mrs. Shapiro says the asylum fits far better with my conception of him than either of these.

Now, as then, he seems trying to understand, straining with all the might of an intense desire to pierce the intricacies of the law that threatens him as he strove then with his problems in mathematics.

When Judge Dowling called upon him to state whether or not he would waive the right of secrecy between patient and nurse, and allow the woman who had tended him in Monte Carlo to testify, he learned forward in his chair and said "I do" in a scarcely audible voice. He follows the proceedings generally, but sometimes they seem to bore him, as they do every one else occasionally, and then he will make some laughing, and apparently ir

I would argue that if I had obtained a disagreement on a mismanaged case—I don't mean by Delmas, who has been too much blamed-what could I not hope from its sane presentment.

Moreover, the first trial did one great thing for Harry Thaw. It estabishes in the public mind a belief in his great love for his wife which had not been there before. His letters to and about the girl whom he made his wife, introduced at the last trial, though crude and incoherent, breathed a strong, genuine devotion which every one must accept, whatever their esti-

HIS LOVE FOR EVELYN SINCERE.

But of the sincerity of Thaw's feeling for her there can be no question. And this feeling raised in him the desire to protect other young girls from the wrongs he believed her to have suffered. It will be remembered that the codicil of his will, offered at the former trial as evidence of his in
